GENERAL INFORMATION

Cottonseed Plus is specially formulated to maximize the performance of pesticides by increasing the deposition and coverage of chemicals on the target crop. This product is designed to create uniform droplet size, reduce evaporation and drift, increase coverage and reduce wash-off. Cottonseed Plus is especially suited for aerial application and applications using low volumes of water. It is compatible with many commonly applied chemicals, however a compatibility test should be done prior to use.

DIRECTIONS FOR USE

In all applications of CottonseedPlus, read and follow the directions for use on the pesticide labels as to precautions, dosage rates, timing of application, and restrictions for the crop on which the pesticide is to be applied. The use of test areas is recommended when applying during periods of high humidity or high temperatures or to new varieties where field experience is limited.
