

CAYUSE[®] PLUS

AMMONIUM SULFATE AND SURFACTANT COMBINATION

CAYUSE[®] PLUS can improve the performance of various herbicides that may require the combination of a surfactant plus a nitrogen source.

- Additional ammonium ions for enhanced uptake
- Contains a high quality surfactant for increased spreading
- Enhanced sequestering to block mineral tie-up of glyphosate and other herbicides

DIRECTIONS FOR USE

Rates of **CAYUSE PLUS** may vary with the conditions of applications. Fill spray tank one half (1/2) full with water. Add the proper amount of **CAYUSE PLUS** and pesticide. Add the remainder of the water. Bypass agitation is sufficient when using **CAYUSE PLUS**, but it should continue until all of the solution has been sprayed.

SUGGESTIONS FOR USE

CAYUSE PLUS should be used to improve the performance of various postemergence soybean or corn herbicide applications where a surfactant/nitrogen solution is required.

Use at the rate of 1-1/2 to 3 pints of **CAYUSE PLUS** per acre in 10 to 20 gallons of spray solution.

Defoliants, Desiccants: Use **CAYUSE PLUS** at a maximum of 1 pint (16 fl. oz.) per acre.

Non-Crop Burndown: Use 2-6 qts. of Cayuse Plus per 100 gallons of spray solution.

Other Herbicides: Use 2-6 qts. of **CAYUSE PLUS** per 100 gallons of spray solution. **CAYUSE PLUS** may also be used with other herbicides such as Roundup® and others where ammonium sulfate is recommended.
