

# FOLI-GRO®

## LIQUID FOLIAR FERTILIZER

### AMINOFOL® MAXIMIZE CALCIUM-ZINC

GUARANTEED ANALYSIS	% By Wt.
Calcium (Ca)* .....	5.00%
0.50% Chelated Calcium	
Zinc (Zn) .....	1.25%
<b>Derived From:</b> Calcium citric acid and zinc citric acid.	
ALSO CONTAINS NON PLANT FOOD INGREDIENT: 0.25% N Acetyl-Thiazolidin-4-Carboxylic Acid - ATCA	

**KEEP OUT OF REACH OF CHILDREN**  
**CAUTION:**  
 Harmful if swallowed. Avoid contact with skin, eyes, or clothing. In case of contact, immediately flush skin or eyes with water for at least 15 minutes.

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.regulatory-info-we.com/>

#### GENERAL INFORMATION

FOLI-GRO® AMINOFOL MAXIMIZE is a foliarly applied micronutrient fertilizer. FOLI-GRO® AMINOFOL MAXIMIZE is intended solely as a supplement to an accepted soil fertilization program.

Applications of FOLI-GRO® AMINOFOL MAXIMIZE will help reduce calcium and zinc deficiency disorders of crops occurring during periods of rapid plant growth or physiological disorders. A plant tissue testing program is recommended to maintain optimum plant growth and development.

#### DIRECTIONS FOR USE

##### METHOD OF APPLICATION:

**GROUND APPLICATION** — Apply the recommended amount of FOLI-GRO® AMINOFOL MAXIMIZE with sufficient water to provide desired coverage. When very low volumes of water are used, a slight burning of the foliage may occur. Ground applications should not exceed 1 quart FOLI-GRO® AMINOFOL MAXIMIZE per gallon of water.

**AERIAL APPLICATION** — Usually 2.5 to 15 gallons of water per acre is sufficient to apply the recommended amount of FOLI-GRO® AMINOFOL MAXIMIZE. Aerial applications should not exceed 1 quart per gallon of water.

A surfactant such as R-11® Spreader Activator or R-56® should be used when foliarly applying FOLI-GRO® AMINOFOL MAXIMIZE.

**NOTE:** FOLI-GRO® AMINOFOL MAXIMIZE can be used as a buffer.

#### RECOMMENDATIONS FOR USE

**NOTE:** FOLI-GRO® AMINOFOL MAXIMIZE is compatible with most pesticides and can be applied in existing spray programs. However, we recommend that any spray mixture containing FOLI-GRO® AMINOFOL MAXIMIZE be tested for compatibility.

FOLI-GRO® AMINOFOL MAXIMIZE contains secondary and micro-nutrient elements calcium and zinc. FOLI-GRO® AMINOFOL MAXIMIZE helps to supplement calcium during periods of rapid growth when "localized calcium deficiency" occurs. The zinc helps to promote auxin production, which favors plant growth and development. These two essential elements help counteract stress factors such as insufficient moisture, improper nutrition, excessive temperatures, mechanical damage or physiological stress.

**CITRUS:** Apply 1-2 quarts per acre at 10-14 day intervals.

**FIELD CROPS:** Apply 1-2 quarts per acre during peak vegetative growth and repeat during peak reproductive growth. Apply at 14 day intervals.

**LEGUMES:** Apply 1-2 quarts during peak vegetative growth and repeat at first bloom.

**RICE:** Apply 1-2 quarts per acre during peak vegetative growth and repeat at panicle initiation.

**SEED CROPS:** Apply 1-2 quarts per acre at early to 15% bloom and repeat at 14-21 day intervals.

**VEGETABLES (including but not limited to cole crops, cucurbits and rootcrops):** Apply 1-2 quarts per acre at 10-14 day intervals, especially during the main growth period.
