Product Information

PURIC™ is a highly refined humic acid product designed for use with various nutrition programs, including as a stand-alone product. Utilizing advanced technology, PURIC extracts organic acids from leonardite, resulting in a clean formulation and reducing common problems associated with sediments found in less enhanced formulas.

Product Features and Benefits

Benefits of PURIC:

- Highly concentrated liquid humic acid
- Advanced extraction process
- Provides flexible application options
- Easy handling
- Greatly reduced sediment

Benefits Attributed to Humic Acid:

- Increases nutrient uptake
- Increases soil buffering capacity
- Improves soil water holding capacity
- Increases CEC (Cation Exchange Capacity)
- Improves soil structure
- Increases soil microbial activity
- Increases root mass
- Increases shoot growth (foliar)
- Increases crop yield and/or quality

Product Application

PURIC can be applied in a broad range of techniques at all stages of plant growth.

**SOIL APPLICATION:** Apply up to 5 gallons per acre

**FOLIAR APPLICATION:** Apply 1-3 quarts per acre

**IRRIGATION SYSTEMS (drip, pivot, solid set):** Apply up to 5 gallons per acre

Blending Guidelines

- When mixing with liquid fertilizer solutions, gradually add fertilizer to PURIC with agitation.
- If adding directly to a concentrated fertilizer solution, PURIC may not readily disperse without adding water.
- Maintain a pH greater than 6.
- Calcium solutions should not be mixed with PURIC.
