Blue Bombshell is a soil surface treatment for control of snails and slugs in citrus groves, orchards, berry crops, vegetable crops and gardens, ornamental gardens, seed crops, dichondra and turfgrass lawns and in ornamental greenhouses. When applied as directed, Blue Bombshell will withstand rain and sprinkling and will offer protection to gardens and lawns for several weeks.

USE PRECAUTIONS

Read entire label before using. Use only as a baiting treatment to be applied directly to the soil area beneath plants as listed on this label. DO NOT allow bait pellet to come in contact with parts of plant that may be used for food or feed purposes. Use a band treatment between rows after formation of edible parts. The grower is responsible for residues on his crops. NOTE: Blue Bombshell should not be applied to dry soil. Applications should be made following an irrigation for best results. DO NOT re-water for 48 hours after application. Apply any time of day, but evening applications are preferred.

APPLICATION INFORMATION

For control of snails and slugs in the following areas, use 1 lb. to treat 2,200 to 4,400 sq. ft. of soil surface, which is equivalent to 20 to 40 lbs. pellets per acre.
